LONG

Funky Modular Interior Objects

Sustainable design doesn't mean giving up the joy of creation - it's a launchpad for creativity. Join the movement !

VANK

VANK_LONG is a distinctive lounge collection with an industrial aesthetic. Lounge chairs and footstools with soft bolster cushions and seats supported by elastic webbing provide comfort and encourage relaxation. LONG is designed for lounge, waiting and meeting areas in offices, hotels and public spaces.

Design: Anna Vonhausen, PhD

VANK_LONG sofas and armchairs are intended for representative lounge areas, waiting zones, and meeting spaces — in offices, hotels, and other public interiors, as well as in home offices and living rooms. The collection blends seamlessly with classic, minimalist, industrial, and japandi-style interiors.

VANK_LONG is a modular collection — a system of frame connectors allows for the creation of sofas, benches, and endlessly long seating arrangements. The base is made of black metal, emphasizing the industrial character of the form.

With the dynamic changes in work models, where work is now possible from almost any location, office environments need to be equally flexible and adaptable. VANK_LONG sofas with high backrests help create zones for both work and relaxation. The bases, equipped with lockable wheels, allow for easy and flexible rearrangement of spaces.

Seats based on elastic webbing belts provide exceptional user comfort and positively influence a sense of wellbeing. The high backrests and upholstered sides ensure visual and acoustic screening.

The VANK_LONG collection has been designed with sustainability in mind. The frame construction allows for disassembly at the end of the product's life cycle.

The cushions are filled with post-industrial polyurethane foam, significantly reducing the product's carbon footprint.

The dedicated VANK_LONG upholstery options include rPET velvets made from recycled PET bottles (AIR, EARTH) and bouclé fabrics made from recycled polypropylene (SOCIETY).

Funky Interior Objects

VANK is a team of architects, engineers and craftspeople. We create furniture. Objects. Statements in space. Intelligently designed products that combine form, function and advanced technologies. We believe in a circular economy. We use recycled materials, materials from renewable sources and plant-fibre-based materials.
